Author of the article:

Evaluation of the article

Evaluation criteria	Evaluation of the paper*			
	good	average	poor	not applicable
1. Originality and topicality of the problem (original study, review of research)				
2. The substantive level of the article (theoretical part, analytical part, sources)				
3. Methodological assumptions of the article (objective, hypotheses, research methods)				
4. Article structure and title adequacy (introduction, logicality, conclusions)				
5. The scope of the solution to the problem (added value, author's contribution to science)				
6. Application values (importance of solving the problem for practice)				
7. Correctness of the paper (academic, language, footnotes, references)				
8. Compatibility of the subject of the article with the subject of the Volume (if it concerns the thematic Volume)				

(*Mark the chosen grade and provide a short justification)

Justification for evaluation

(necessary in the case of a negative decision), detailed comments and necessary revisions (necessary if the text is sent to the author for revision)

Conclusions

(applies to the qualification of the article for publication). Mark the chosen conclusion and, if applicable, specify the scope of necessary revisions

acceptance of the text and its referral to external reviews

rejection of the reviewed text

referral of the text to the author to make the necessary revisions
